Executive Summary

Security Operations and Network Security professional with 7+ years of experience in SOC operations, SIEM monitoring, incident response, and team leadership, specializing in security service delivery and operational execution. Skilled in Microsoft Sentinel, Sumo Logic, ServiceNow, firewall administration, threat hunting, and enterprise security operations. Proven ability to lead 24×7 SOC teams, maintain SLA compliance, mentor analysts, and deliver security outcomes aligned with business objectives. Strong fit for cybersecurity leadership roles requiring technical expertise, stakeholder coordination, and operational excellence.

Technical Skills

- **SIEM Technologies:** Microsoft Sentinel, Sumo Logic,
 - **Security Monitoring:** EDR, IDS/IPS, Firewall Logs, Security Monitoring & Analysis, Threat Hunting,
 - **Firewalls & Network Security:** Fortinet, Cisco Firepower, Sophos, Check Point Firewall Administration,
 - **Incident Management:** ServiceNow, Incident Response, RCA, Escalation Handling, P1/P2 Incident Management
 - **Endpoint Security:** Microsoft Defender, Trend Micro, Sophos
 - **Vulnerability Management:** Nessus
 - **Phishing Campaign Tools Known:** GoPhish, KnowBe4
-

Soft Skills

- Communication & Teamwork
- Change Management & Shift Management
- Leadership & Team Management
- Client Management
- Problem Solving & Decision Making
- Time Management
- Mentorship & Team Development

Professional Experience

TCS, Hyderabad, Telangana — May 2024 – Present

Role: Security Operations – SME

Responsibilities

- Act as SIEM and SOC Lead overseeing 24×7 security monitoring and incident response operations.
- Led a cross-functional SOC team of 30 analysts responsible for shift planning, workload distribution, escalation handling, and performance monitoring.
- Acted as Incident Commander for P1/P2 security incidents, leading triage, containment, stakeholder communication, and RCA reporting.
- Reviewed infrastructure security architecture design and firewall ACL rule configurations.
- Performed firewall version upgrades with pre-check and post-check validations to ensure security and stability.
- Collaborated with application teams for connectivity testing after ACL rule configuration.
- Analyzed SIEM alerts, firewall logs, and endpoint telemetry to provide actionable security insights.
- Developed SOPs, technical documentation, and security best practices.
- Created and maintained Microsoft Sentinel dashboards and workbooks for reporting.
- Managed ServiceNow ticketing and maintained more than 95% SLA compliance.
- Prepared monthly Governance reports for stakeholders and clients.
- Mentored junior analysts through hands-on guidance and awareness sessions.

Impact

- Managed and mentored a team of 20 SOC analysts in a 24×7 security operations environment.
- Maintained over 95% SLA compliance for incident response and ticket resolution.
- Improved operational visibility through Microsoft Sentinel dashboards and reporting.
- Strengthened incident response effectiveness with structured escalation and RCA reporting.

BharatFIH, Tada, Andhra Pradesh — March 2023 – August 2023

Role: Network Engineer

Responsibilities

- Designed and supported secure network architectures to improve system availability.
- Implemented IAM and access controls to strengthen Windows OS security.
- Supported network security monitoring, troubleshooting, and cybersecurity initiatives.
- Collaborated with stakeholders to maintain secure and stable network operations.
- Participated in security awareness and cybersecurity training activities.

Impact

- Reduced network downtime by approximately 10% through secure network support and troubleshooting.
- Strengthened access security through IAM and endpoint security improvements.

HTC Global Services, Chennai, Tamil Nadu — August 2021 – March 2023

Role: SOC Analyst

Responsibilities

- Performed SIEM monitoring, incident validation, and response for enterprise environments.
- Coordinated incident response with customers and stakeholders.
- Tuned SIEM queries and correlation rules to reduce false positives and improve monitoring.
- Conducted threat hunting, phishing analysis, and malware investigations using sandbox and OSINT tools.
- Investigated VPN, MFA/2FA, and authentication-related security incidents.
- Supported SOC process improvements, reporting, and leadership reviews.
- Participated in client meetings to discuss incidents, remediation, and trends.

Impact

- Contributed to a 25% reduction in incident response time.
- Reduced false positives through SIEM tuning and rule optimization.
- Enhanced threat detection and monitoring visibility.

Zen Lenin International Pvt Ltd, Tada, Andhra Pradesh — June 2019 – August 2021

Role: Production Supervisor (Team Lead)

Responsibilities

- Led operational teams to manage schedules, productivity, and quality targets.
- Managed team performance and day-to-day operational execution.
- Coordinated work delivery and project execution activities.
- Supported process discipline and operational efficiency improvements.
- Built foundational leadership, stakeholder management, and decision-making skills.

Impact

- Improved operational coordination and delivery performance through structured supervision.
- Built leadership and team management capabilities in a fast-paced environment.

Education

Bachelor of Business Administration (BBA), Annamalai University — 2023

Professional Diploma in Cyber Investigation and Law (PDCIL), Hindustan University — 2020

Diploma in Mechanical Engineering (DME), TJS Polytechnic College — 2019

Awards & Accomplishments

- SC-200, Microsoft Security Operations Analyst Associate — March 2026
- Project Management Certification, Loyola Institute of Business Administrator — May 2024
